

Course Detail Information

Course Number:	1051-402
Course Name:	COLOR SCIENCE
Course Title:	COLOR SCIENCE
Course Description:	This course presents an introduction to color perception, measurement, and reproduction. Based upon an understanding of the human visual system, psychophysics, and radiometric measurements and computations, this course explores in more detail the basis of color perception, applies those principles to the measurement of color stimuli, and then explores applications of color science in imaging. (1051-350, 370) Class 4, Credit 4 (F)
Credit Hours:	4
Course Notes:	
Section Types Offered:	Lecture
Replaces Course:	0251-402
Future Term Offerings:	<i>No future term offerings currently available.</i>
