Quarter(s) offered (check)

Fall   Winter   X   Spring   Summer

Students required to take this course: (by program and year, as appropriate)
First year graduate students in Imaging Science, MS and PhD program.

Students who might elect to take this course:
None.

3.0 Goals of the course (including rationale for the course, when appropriate)
To introduce students to the research topics studied by Faculty in the Center for Imaging Science, and to tools and techniques for them to pursue their own research.

4.0 Course description (as it will appear in the RIT Catalog, including pre- and co-requisites, quarters offered)

1051-708 Introduction to Imaging Science II
This course is focused on familiarizing students with research activities in the Carlson Center, research practices in the university, research environment and policies and procedures impacting graduate students. The course is coupled with the research seminar sponsored by the Center for Imaging Science (usually weekly presentations). Students are expected to attend and participate in the
seminar as part of the course. The course also addresses issues and practices associated with technical presentation and technical writing. Credits earned in this course apply to research requirements. **Class 1, Credit 1 (S)**

5.0 **Possible resources (texts, references, computer packages, etc.)**

5.1 None.

6.0 **Topics**

6.1 Student presentations of their research proposals.

7.0 **Intended learning outcomes and associated assessment methods of those outcomes**

</table>

8.0 **Program or general education goals supported by this course**

8.1 Satisfies one research credit hour required for graduation.
8.2 Prepares graduate students in imaging science to pursue their research topic.

9.0 **Other relevant information** (such as special classroom, studio or lab needs, special scheduling, media requirements, etc.)

9.1 Classroom with computer projection system and internet access.

10.0 **Supplemental information**

None.
