

Notes for Linear Image Mathematics

Roger Easton, Harvey Rhody, Navalgund Rao, Maria Helguera

Chester F. Carlson Center for Imaging Science

Rochester Institute of Technology

Contents

Preface	ix
1 Introduction to System Modeling	1
1.1 Mathematical Models of Systems	1
1.2 Three Imaging Problems	2
1.3 Classification of Images	4
1.4 Special properties of transformations	16
1.4.1 Linear Transformations	17
1.4.2 Shift-invariant Transformations	17
1.4.3 Linear Shift-invariant (LSI) Transformations	21
2 Vector Space Concepts	25
2.1 Modeling Images and Systems	25
2.1.1 Vector spaces	25
2.1.2 Subspaces	30
2.1.3 Coordinate Systems	31
2.1.4 Conclusion	48
3 Modeling with Linear Equations	49
3.1 Linear Equations and matrices	49
3.1.1 Solving a system of linear equations	55
3.1.2 Solving Linear Equations	57
3.1.3 Matrix Operations	65
4 Determinants, Eigenvalues and Eigenvectors	81
4.1 Background	81
4.2 Introduction	83
4.2.1 Case $n = 1$	83

4.2.2	Case $n = 2$	83
4.2.3	Case $n = 3$	86
4.2.4	General case	88
4.3	Useful Theorems	90
4.4	Cramer's Rule	95
4.4.1	A Solution for \mathbf{A}^{-1}	97
4.5	Introduction: Eigenvalues and Eigenvectors	99
4.5.1	Structure of the System Matrix	103
4.6	Computing Eigenvalues and Eigenvectors	105
4.6.1	Finding the Eigenvalues	106
4.6.2	Finding the Eigenvectors	107
4.7	Useful Eigenvector Results	108
4.8	Good Eigenvectors	115
4.8.1	Diagonal Similarity	116
4.8.2	Summary	122
4.9	Symmetric Matrices	125
4.9.1	Normal Matrices	131
4.9.2	Circulant Matrices	131
5	Basics of Complex Variables	135
5.1	Complex Variables	135
5.1.1	Complex Numbers	137
5.1.2	Exponential Function	142
5.2	Powers of Complex Numbers	144
5.3	Exponential Functions	146
5.4	Complex Functions	149
5.5	Functions with a Complex Argument	150
5.5.1	Polynomials in z	151
5.5.2	Trigonometric Functions of z	151
5.6	Derivatives	154
5.6.1	Limits	155
5.6.2	Continuity	156
5.6.3	Derivatives of Complex Functions	158
5.6.4	Analytic Function Tests	161
5.7	Conclusion	163

6	Special Functions	165
6.1	The Special Functions of Imaging	165
6.1.1	Constant function	166
6.1.2	Rectangle function	168
6.1.3	Triangle function	168
6.1.4	Signum function	169
6.1.5	Step function	170
6.1.6	Exponential function	171
6.1.7	Sinusoid	172
6.1.8	Sinc function	173
6.1.9	Sinc ² function	174
6.1.10	Quadratic-phase sinusoid- Chirp function	174
6.1.11	Gaussian function	175
6.1.12	1-D Dirac delta function	176
6.1.13	<i>Symmetric (even) pair of Dirac delta functions</i>	179
6.1.14	<i>Antisymmetric (odd) pair of Dirac delta functions</i>	179
6.1.15	Comb function	180
6.1.16	Derivatives of the <i>Dirac delta</i> function	181
6.2	Manipulation of given functions	182
6.2.1	Transformations of the independent variable: shift, reflection and scaling operations	183
6.3	1-D Complex-Valued Special Functions.	194
6.3.1	Complex <i>Linear-Phase</i> Sinusoid	195
6.3.2	Complex <i>Quadratic Phase Exponential- Complex Chirp</i>	195
6.3.3	<i>Superchirp</i> function	196
6.3.4	Logarithm of the Complex Amplitude	196
6.3.5	1-D <i>Stochastic</i> functions-Noise	197
6.3.6	The <i>Moments</i> of a Probability Distribution	198
6.3.7	Discrete Probability Laws	200
6.3.8	Continuous Probability Laws	202
6.4	2-D Special Functions	204
6.4.1	2-D Separable Functions	205
6.4.2	2-D Constant function	206
6.4.3	2-D Rectangle function	207
6.4.4	2-D Triangle function	208
6.4.5	2-D Step function	209
6.4.6	2-D separable Sinc function	210
6.4.7	2-D separable Sinc ² function	211

6.4.8	2-D separable Gaussian function	212
6.4.9	2-D Sinusoidal function	213
6.4.10	2-D functions with <i>circular</i> symmetry	216
6.4.11	Cylinder function	217
6.4.12	Circularly symmetric Gaussian function	218
6.4.13	Circularly symmetric Bessel function of zero order	218
6.4.14	Besinc or “Sombrero” function	219
6.4.15	Circular (polar) triangle function	221
6.5	2-D Dirac delta function and its relatives	221
6.5.1	Properties of the separable 2-D Dirac delta function in Cartesian coordinates	223
6.5.2	Properties of the 2-D Dirac delta function in polar coordinates	224
6.5.3	2-D separable comb function	226
6.5.4	2-D line delta function	226
6.5.5	“Corral” function	227
6.5.6	Ring delta function	228
6.5.7	Radial comb function	229
7	Orthogonality of One Dimensional Functions	231
7.1	Development of Orthogonal Representations of 1-D Functions	231
7.2	Orthogonality:	235
7.3	The Norm of a Vector and Orthonormality	238
7.4	Finding the Coordinates of an Arbitrary Vector in a Given Basis	240
7.5	Projection of a Function onto a Subspace having an Ortho-normal Basis	245
7.6	Fourier Series Representation of Periodic Signals:	255
7.7	The exponential Fourier Series:	256
7.8	Chapter Summary with an Example	258
8	Classification of Systems	263
8.1	Classification of systems	263
8.1.1	Operators and systems	263
8.1.2	Linear operators	264
8.1.3	Shift-invariant operators	271
8.1.4	Linear, shift-invariant operators	275
8.1.5	Convolution properties of the delta function	281

8.1.6	<i>LSI</i> system impulse response and eigenvalues	282
9	Convolution and Correlation	289
9.1	Convolution and correlation	289
9.1.1	Properties of convolutions	297
9.1.2	Region of support of convolutions	298
9.1.3	Area of a convolution	300
9.1.4	Convolution of scaled functions	300
9.1.5	Crosscorrelation and relationship to convolution	301
9.1.6	Autocorrelation	305
9.1.7	Convolution of 2-D functions	307
9.1.8	Crosscorrelation of 2-D functions	309
9.1.9	Autocorrelation of 2-D functions	309
10	The Fourier Transform and its Properties	311
10.1	The Fourier transform and its properties	311
10.1.1	Fourier transform of complex-valued functions	316
10.1.2	The inverse Fourier transform. Waveform synthesis from the spectrum.	318
10.1.3	Fourier transform examples	320
10.1.4	Fourier transform of special functions	322
10.1.5	Fourier Transform Pairs	336
11	Theorems of the Fourier Transform	345
11.1	Theorems of the Fourier transform	345
11.1.1	Addition theorem – Linearity of the Fourier transform	345
11.1.2	Multiplication by a constant	346
11.1.3	Fourier transform of a Fourier transform	346
11.1.4	Central-ordinate theorem	348
11.1.5	Scaling theorem	349
11.1.6	Shift theorem	352
11.1.7	Filter theorem	353
11.1.8	Modulation theorem	356
11.1.9	Derivative theorem	358
11.1.10	Fourier transform of the complex conjugate	359
11.1.11	Fourier transform of the crosscorrelation	361
11.1.12	Fourier transform of the autocorrelation. Wiener-Khintchin theorem	363

11.1.13	Rayleigh's (Plancherel's) theorem	363
11.1.14	Parseval's theorem	365
11.1.15	Fourier transform of a periodic function	365
11.1.16	Fourier transform of a function sampled at uniform intervals	366
11.1.17	Fourier transform of a discrete periodic function	367
11.1.18	Fourier transforms of stochastic signals	367
12	Discrete Linear Systems, Sampling	369
12.1	Discrete linear systems, sampling	369
12.1.1	Ideal sampling	371
12.1.2	Ideal sampling of 2-D functions	375
12.1.3	Properties of the sampling operation	375
12.1.4	Artifacts introduced by sampling. Aliasing	379
12.1.5	Operations similar to ideal sampling	385
12.2	Ideal sampling of special functions	385
12.3	Ideal sampling of the discrete Dirac delta and COMB functions	389
12.4	Inverse sampling. Interpolation. Recovery of continuous functions from sample amplitudes.	390
12.5	Whittaker-Shannon sampling theorem	401
12.5.1	Examples of sampling and aliasing in the frequency domain:	402
12.6	Prefiltering to prevent aliasing. Antialiasing filters	406
12.6.1	Recovery of prefiltered imagery from the samples	409
12.6.2	Sampling and reconstruction of audio signals	410
13	Discrete Fourier Transform	413
13.1	Discrete Fourier Transform	413
13.1.1	A graphical development	413
13.1.2	Numerical derivation of <i>DFT</i>	417
13.1.3	Interpretation and symmetry relations	422
14	Multidimensional Fourier Transforms	427
14.1	Multidimensional Fourier transforms	427
14.1.1	Fourier transform of separable 2-D functions	430
14.1.2	Theorems of the Fourier transform of separable functions	434
14.1.3	Fourier transform of superpositions of 2-D separable special functions	435

14.1.4	Properties and theorems of the general 2-D Fourier transform	436
14.2	Fourier transform of circularly symmetric functions. The Hankel transform	438
14.2.1	Hankel transform of the circularly symmetric Dirac delta function	444
14.2.2	Inverse Hankel transform	445
14.2.3	Theorems of the Hankel transform	447
14.2.4	Hankel transform of other special functions	448
14.2.5	Hankel transforms derived from 2-D Fourier transforms	452
14.2.6	Hankel transform of $r^2 GAUS(r)$	454
14.2.7	Hankel transform of $CTRI(r)$	454
15	Imaging System Analysis	457
15.1	Imaging system analysis	457
15.1.1	The point spread function (PSF)	459
15.1.2	The line spread function (LSF)	462
15.1.3	The edge spread function (ESF)	464
15.1.4	The modulation transfer function (MTF)	466
16	Analysis of Complete systems	473
16.1	Analysis of complete systems	473
16.2	Projections	475
16.3	Optics and imaging systems	478
16.3.1	Empirical models for the response of a film subsystem .	480
16.4	Realistic sampling. Averaging by the detector	481
17		489
A	Homework Exercises	1-1
A-I	Homework Exercises for Chapter 1	1-1
A-II	Homework Exercises for Chapter 2	2-1
A-III	Homework Exercises for Chapter 3	3-1
A-IV	Homework Exercises for Chapter 4	4-1
A-V	Homework Exercises for Chapter 5	5-1
A-VI	Homework Exercises for Chapter 6	6-1
A-VII	Homework Exercises for Chapter 7	7-1
A-VIII	Homework Exercises for Chapter 8	8-1

A-IX	Homework Exercises for Chapter 9	9-1
A-X	Homework Exercises for Chapter 10	10-1
A-XI	Homework Exercises for Chapter 11	11-1
A-XII	Homework Exercises for Chapter 12 and Chapter 13	12-1
A-XIII	Chapter 13 Homework Problems	13-1
A-XIV	Chapter 14 Homework Problems	14-1
A-XV	Long Problem. Project #1	15-1
A-XVI	Long Project #2	16-1
A-XVII	Long Project #3	17-1
A-XVIII	Resolution and aliasing error compromise in undersampled data	17-1
A-XVIII	Compromise between degree of aliasing and resolution loss	17-4
A-XVIII	System parameter definition:	17-5
B	Homework Solutions	1-1
B-I	Chapter 1 Homework Solutions	1-1
B-II	Chapter 2 Homework Solutions	2-1
B-III	Chapter 3 Homework Solutions	3-1
B-IV	Chapter 4 Homework Solutions	4-1
B-V	Chapter 5 Homework Solutions	5-1
B-VI	Chapter 6 Homework Solutions	6-1
B-VII	Chapter 7 Homework Solutions	7-1
B-VIII	Chapter 8 Homework Solutions	8-1
B-IX	Chapter 9 Homework Solutions	9-1
B-X	Homework Exercises for Chapter 10	10-1
B-XI	Homework Exercises for Chapter 11	11-1
B-XII	Homework Exercises for Chapter 12 and Chapter 13	12-1
C	Solved Problem Sets	1-1
C-I	Chapter 1 Solved Problems	1-1
C-II	Chapter 2 Solved Problems	2-1
C-III	Chapter 3 Solved Problems	3-1
C-IV	Chapter 4 Solved Problems	4-1
C-V	Chapter 5 Solved Problems	5-1
C-VI	Chapter 6 Solved Problems	6-1

CONTENTS	xiii
C-VI Chapter 7 Solved Problems	7-1
C-VII Chapter 8 Solved Problems	8-1
C-IX Chapter 9 Solved Problems	9-1
D Bibliography	0-7
