Photographic Technology: What's next? What's Needed?

Paul Worthington

*Lead Analyst, Consumer Digital Photography
Future Image*

FUTURE IMAGE
MARKET ANALYSIS

4pm, Wed., Feb. 13, 2008

Auditorium of the Center for Imaging Science

Worthington will address the latest advances in consumer digital imaging, as well as what is still needed, and possible solutions. Topics will include location-aware imaging, geo-tagging, image archiving, panoramic pictures, high dynamic range, and extended focal depth.

Speaker Bio

Paul Worthington is Future Image's lead analyst for consumer digital photography. For ten years Worthington has produced The Future Image Report monthly newsletter — read by business leaders in more than fifty countries worldwide — and the companion Future Image Weekly Briefing. At Future Image, Worthington has concentrated on location-aware imaging, consumer cameras, web photo sharing, digital video, and photofinishing. He has also consulted with many top companies in the imaging industry in general, and in these areas specifically.

Worthington was previously a technology correspondent and magazine editor for more than a decade, specifically covering imaging, multimedia, and digital video in that time. He is the former Editor in Chief of MacHome, and has worked at InfoWorld, Publish, and Multimedia World magazines.
