## Digital Print Permanence: Recent Research

**Daniel Burge**

*Senior Research Scientist*

*Image Permanence Institute, Rochester Institute of Technology*

The Image Permanence Institute is currently investigating the long-term keeping of digitally printed materials in cultural heritage institutions. The project consists primarily of experiments monitoring the effect of exposing digitally printed documents and photographs to a variety of environmental stresses: light, airborne pollutants, heat, humidity extremes, handling, and flood. Recommendations will be produced for the care and usage of these materials for libraries, archives, and museums.

**4pm, Wed, Jan. 7, 2009**
