

## **POSITION: Electrical Engineer / Full Time / Entry Level**

### **JOB DESCRIPTION:**

Due to Control Chief Corporation's continued growth we have a vacancy for an entry level Electrical Engineer to work in our Applications & Project Engineering group. This position as "Applications Engineer" will require a formally educated engineering candidate with a 4-year degree in Electrical Engineering, Electrical Engineering Technology, Engineering Science & Technology, or Physics. The ideal candidate will have AutoCAD experience and some "real world" industrial controls experience.

Our application Engineers play a key role working between Sales, our Customers and Manufacturing to ensure the right equipment set is proposed, documented completely, and produced on target in a timely manner. Ensuring Customer satisfaction is our #1 objective.

### **DESIRED SKILLS AND EXPERIENCE:**

4-year degree in Electrical Engineering, Electrical Engineering Technology, Engineering Science & Technology, or Physics. The ideal candidate will have AutoCAD experience and some "real world" industrial controls experience.

### **COMPANY DESCRIPTION:**

Control Chief Corporation is an industry leader in the design, manufacture and service of specialized radio and infrared remote control systems. For the past 4 decades Control Chief has provided their customers in North America and internationally, with highly reliable control systems for the locomotive and material handling industries.
