Kevin Kochersberger is the Director of the Unmanned Systems Lab, a lab that hires 10 graduate students and hosts about 20 undergraduates during a typical academic year. As an Associate Professor of Mechanical Engineering, Dr. Kochersberger received all of his higher education degrees from Virginia Tech in Mechanical Engineering and was a professor at the Rochester Institute of Technology from 1994 – 2006 in Mechanical Engineering. Prior to returning to VT in 1989 for his Ph.D., he worked at McDonnell Douglas (now Boeing) in structural dynamics on the F/A-18, and also worked at IBM on submarine electronics. He is an avid pilot and flew the 1903 Wright Flyer Reproduction aircraft for the Centennial of Flight Celebration in Kitty Hawk, North Carolina on December 17, 2003.
