When you plug the camera into the computer this box will automatically open. Just close it.
1. Double click on “My Computer”. You will see the icon for the D50 camera in the box.

2. Double click on the D50 icon.
You will see your pictures in the box.
Drag the photos to a folder on your desktop. In this example, the folder will be called “Urban League”.

Urban League
Double click on the Urban League folder to see your pictures.
Rename your images “LEFT” and “RIGHT” so you know which is which.
Start the Photoshop program
This is what Photoshop looks like.
Open your image files.
Navigate to the Urban League folder.
Double click on the Urban League folder to see your pictures
Select both images (LEFT and RIGHT) and click “Open”
Both images will be open. With the RIGHT image on top, go to “Select”, then “All”
Next, go to “Edit”, then “Copy”
Now close the RIGHT image, and make sure the LEFT is on top. Go to “Select” “All.”
Go to “Edit” “Paste Into”
You now have both the right and left images in the same window.
With your mouse, RIGHT CLICK on “Layer 1” and select “Blending Options…”
This is what you’ll see. Under “Advanced Blending” look for the “Channels R G B”
UNCHECK the box labeled “R” so that it is now empty.
Now Double Click on the box labeled “Background”
Click on “OK”
Click on the small arrow at the top of the toolbar, and use it to move the “ghost” images until you get the two layers aligned the way you want them.
