Dr. Noah Snavely
Assistant Professor of Computer Science
Cornell University

Noah Snavely is an Assistant Professor of Computer Science at Cornell University working in computer vision and graphics. He received his Ph.D. in Computer Science and Engineering from the University of Washington in 2008. Noah’s research focuses on 3D reconstruction and visualization of environments from large-scale, unstructured 2D photo collections, including photos downloaded from Web image search. His work on the Photo Tourism system for modeling and navigation image sets in 3D was the basis for Microsoft's Photosynth (http://photosynth.net), a commercial product for building and sharing 3D photo collections. Noah is the recipient of a National Science Foundation Graduate Research Fellowship and a ACM Dissertation Award Honorable Mention, and his work has been featured in the New York Times, CNN, and Popular Science.
