

Living With Fake Images – How Do We Know When We're Being Fooled?

Dr. Robert Fiete

Chief Technologist
Space Systems Division, ITT Industries

Like it or not, the reality is that fake images are everywhere and have become a part of today's culture, thanks primarily to the popularity of the Internet, digital cameras, and the availability of desktop imaging software. An overview of how fake images are created and how we can attempt to identify them will be presented.

About the author:

Dr. Robert Fiete received a BS degree in physics and math from Iowa State University and an MS and PhD degree in optical sciences from the University of Arizona. He is currently Chief Technologist of the Space Systems Division at ITT Industries (formerly Eastman Kodak's Commercial and Government Systems Division).
