

# LIST OF PUBLICATIONS

10.2002

1. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
I .Actual Dyes in Color Film. (1)Optimum Peak Wavelengths and Breadths of Cyan, Magenta, and Yellow  
Phot.Sci.Eng.**15**(5),399-415(1971).
2. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
I .Actual Dyes in Color Film. (2)Influence of Unwanted Secondary Absorption Peak  
Phot.Sci.Eng.**15**(5),416-422(1971).
3. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
I .Actual Dyes in Color Film. (3)Stability of Gray Balance  
Phot.Sci.Eng.**16**(3),203-207(1972).
4. N.Ohta  
Influence of Color Temperature Upon Optimum Spectral Characteristics of Three Dyes  
Farbe **21**(1/6),154-160(1972).
5. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
II .Actual Dyes in Color Prints. (1)Optimum Peak Wavelengths and Breadths of Cyan, Magenta, and Yellow  
Phot.Sci.Eng.**16**(3),208-213(1972).
6. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
II .Actual Dyes in Color Prints. (2)Optimum Spectral Characteristics of Absorption Bands  
Phot.Sci.Eng.**17**(2),183-187(1973).
7. N.Ohta  
Optimum Absorption Bands of Subtractive Dyes for Colour Photography  
Nature **235**(Jan 10),37-39(1972).
8. N.Ohta  
Structure of the Color Solid Obtainable by Three Subtractive Color Dyes  
Farbe **20**(1/3),115-134(1971).
9. N.Ohta  
Stability of Selective Grey Obtainable by Use of Subtractive Colour Dyes  
J.Phot.Sci.**20**(4),149-153(1972).
10. N.Ohta  
Comparison of Colour Reproduction Quality between Transmission-Type Colour Films and Reflection-Type Colour Prints  
J.Phot.Sci.**20**(6),238-242(1972).
11. N.Ohta  
Fast Calculation of Trichromatic Specification with Integer Mode Manipulation  
Color and Appearance **2**(1),41-42(1973).

12. N.Ohta  
Reflection Density of Multilayer Color Prints. I .Specular Reflection Density  
Phot.Sci.Eng.**15**(6),487-494(1971).
13. N.Ohta  
Reflection Density of Multilayer Color Prints. II .Diffuse Reflection Density  
J.Opt.Soc.Am.**62**(2),185-191(1972).
14. N.Ohta  
Reflection Density of Multilayer Color Prints. (3)Influence of Refractive Index of  
Binder  
Phot.Sci.Eng.**16**(5),334-340(1972).
15. N.Ohta  
Fast Computing of Color Matching by Means of Matrix Representation  
Part 1: Transmission-Type Colorant  
Appl.Opt.**10**(9),2183-2187(1971).
16. N.Ohta  
Fast Computing of Color Matching by Means of Matrix Manipulation  
II .Reflection-Type Color Print  
J.Opt.Soc.Am.**62**(1),129-136(1972).
17. N.Ohta  
Metameric Color Matching in Subtractive Color Photography  
I .Dye System in Obedience to Lambert-Beer Law  
Phot.Sci.Eng.**16**(2),136-143(1972).
18. N.Ohta  
Metameric Color Matching by Dye Systems Deviating from the Lambert-Beer Law  
Farbe **20**(4/6),243-250(1971).
19. N.Ohta  
Minimizing Maximum Error in Matching Spectral Absorption Curves in Color  
Photography  
Phot.Sci.Eng.**16**(4),296-299(1972).
20. N.Ohta and H.Urabe  
Spectral Color Matching by Means of Minimax Approximation  
Appl.Opt.**11**(11),2551-2553(1972).
21. N.Ohta  
Designing Energy Converting Filters by Means of the Minimax Approximation  
Farbe **20**(4/6),238-242(1971).
22. N.Ohta  
Estimating Absorption Bands of Component Dyes by Means of Principal  
Component  
Analysis  
Anal.Chem.**45**(3),553-557(1973).
23. N.Ohta (in Japanese)  
Color Matching in Subtractive Color Photography. ( I )Metameric Color Matching by  
Newton-Raphson Method  
J.Soc.Phot.Sci.Tech.Jpn.**36**(1),25-36(1973).
24. N.Ohta (in Japanese)  
Color Matching in Subtractive Color Photography. ( II )Metameric Color Matching by  
Nonlinear Optimization  
J.Soc.Phot.Sci.Tech.Jpn.**36**(3),187-192(1973)

25. N.Ohta (in Japanese)  
Color Matching in Subtractive Color Photography. (3)Spectral Color Matching by Minimax Approximation  
J.Soc.Phot.Sci.Tech.Jpn.**36**(4),236-240(1973).
26. N.Ohta and K.Takahashi (in Japanese)  
Estimation of Number and Spectral Characteristics of Component Dyes by Principal Component Analysis. (1)Two-Component System  
J.Soc.Phot.Sci.Tech.Jpn.**36**(5),291-303(1973).
27. N.Ohta (in Japanese)  
Color Matching in Subtractive Color Photography. (4)Spectral Color Matching by Nonlinear Optimization  
J.Soc.Phot.Sci.Tech.Jpn.**36**(6),346-348(1973).
28. N.Ohta (in Japanese)  
Color Reproduction in Subtractive Color Photography  
Jpn.J.Opt.**3**(1),2-19(1974).
29. N.Ohta (in Japanese)  
New Computer Technique for Resolving Overlapped Spectra  
Chemistry and Chemical Industry **27**(6),401-405(1974).
30. N.Ohta and G.Wyszecki  
Theoretical Chromaticity-Mismatch Limits of Metamers Viewed under Different Illuminants  
J.Opt.Soc.Am.**65**(3),327-333(1975).
31. N.Ohta  
Nonlinear Optimization; Some Applications to Colorant Formulations  
Appl.Opt.**14**(6),1452-1454(1975).
32. N.Ohta and G.Wyszecki  
Extreme Errors of Numerical Integrations in Colorimetric Calculations  
J.Opt.Soc.Am.**65**(7),834-838(1975).
33. N.Ohta and G.Wyszecki (in Japanese)  
Theoretical Limits of Errors in Colorimetric Calculations  
Jpn.J.Opt.**4**(4),163-168(1975).
34. N.Ohta  
Generating Metameric Object Colors  
J.Opt.Soc.Am.**65**(9),1081-1082(1975).
35. N.Ohta and G.Wyszecki  
Theoretical Chromaticity-Mismatch Limits of Metamers Due to a Change from CIE Illuminant  $D_{65}$  to C  
J.Opt.Soc.Am.**65**(10),1152-1153(1975).
36. N.Ohta and G.Wyszecki  
Color Changes Caused by Specified Changes of the Illuminant  
J.Opt.Soc.Am.**65**(10),1174A-1175A(1975).
37. N.Ohta and G.Wyszecki  
Colorimetric Significance of Emission Lines in Illuminants  
J.Opt.Soc.Am.**65**(10),1175A-1175A(1975).

38. N.Ohta and G.Wyszecki (in Japanese)  
Theoretical Limits of Metamerism Caused by Change in Illuminants.  
(1)One Reference Illuminant  
J.Ill.Eng.Inst.Jpn.**59**(6),235-240(1975).
39. N.Ohta and K.Takahashi (in Japanese)  
Estimation of Number and Spectral Characteristics of Component Dyes  
by Principal Component Analysis. (2)Three-Component System  
J.Soc.Phot.Sci.Tech.Jpn.**38**(3),284-290(1975).
40. N.Ohta and G.Wyszecki  
Colorimetric Significance of Mercury-Emission Lines in Fluorescent Lamps  
J.Opt.Soc.Am.**65**(11),1354-1358(1975).
41. K.Takahashi and N.Ohta (in Japanese)  
Estimation of Number and Spectral Characteristics of Component Dyes by Principal  
Component Analysis. (III)Multi-Component System  
J.Soc.Phot.Sci.Tech.Jpn.**38**(6),515-518(1975).
42. N.Ohta and G.Wyszecki (in Japanese)  
Theoretical Limits of Metamerism by Changes in Illuminants.  
(2)Plural Reference Illuminant  
J.Illum.Eng.Inst.Jpn.**59**(9),458-461(1975).
43. N.Ohta and G.Wyszecki (in Japanese)  
Influence of Illuminant upon Metamerism of Color Images  
J.Soc.Phot.Sci.Tech.Jpn.**39**(1),5-13(1976).
44. N.Ohta (in Japanese)  
Modern Colorimetry and Its Application to Color Photography  
J.Soc.Phot.Sci.Tech.Jpn.**39**(2),102-109(1976).
45. N.Ohta  
Color Reproduction in Reflection-Type Color Prints  
J.Appl.Phot.Eng.**2**(2),75-81(1976).
46. N.Ohta  
Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
II .Hypothetical Four-Dye System  
Phot.Sci.Eng.**20**(3),149-154(1976).
47. N.Ohta and G.Wyszecki  
Color Changes Caused by Specified Changes in the Illuminant  
Color Res. Appl.**1**(1),17-21(1976).
48. N.Ohta and G.Wyszecki  
Designing Illuminants that Render Given Objects in Prescribed Colors  
J.Opt.Soc.Am.**66**(3),269-275(1976).
49. W.S.Stiles, G.Wyszecki, and N.Ohta  
Counting Metameric Object-Color Stimuli Using Frequency-Limited Reflectance  
Functions  
J.Opt.Soc.Am.**67**(6),779-784(1977).
50. N.Ohta (in Japanese)  
On generating Metameric Object Colors  
J.Illum.Eng.Inst.Jpn.**60**(2),64-66(1976).

51. N.Ohta (in Japanese)  
On Errors in Colorimetric Calculations  
Opt.Eng.Contact **15**(12),31-36(1977).
52. N.Ohta and G.Wyszecki (in Japanese)  
Designing Illuminants which Give Prescribed Tristimulus Values to Given Object Colors  
J.Illum.Eng.Inst.Jpn.**62**(1),5-10(1978).
53. N.Ohta  
Correspondence between CIELAB and CIELUV Color Differences  
Color Res.Appl.**2**(4),178-182(1977).
54. N.Ohta and G.Wyszecki  
Location of the Nodes of Metameric Color Stimuli  
Color Res.Appl.**2**(4),183-186(1977).
55. N.Ohta, K.Takahashi, H.Urabe, and T.Miyagawa (in Japanese)  
Image Simulation by Use of Laser Color Printer  
O plus E No.**22**,57-64(1981.9).
56. N.Ohta  
Maximum Errors in Estimating Spectral-Reflectance Curves from Multispectral Image Data  
J.Opt.Soc.Am.**71**(7),910-913(1981).
57. N.Ohta  
Evaluation of Spectral Sensitivities  
Phot.Sci.Eng.**25**(3),101-107(1981).
58. N.Ohta  
Simplified Algorithm of Color Matching in Subtractive Color Photography  
Phot.Sci.Eng.**25**(4),161-163(1981).
59. N.Ohta (in Japanese)  
Application of Statistical Methods to Research and Development Quality **12**(1),53-64(1982).
60. N.Ohta  
Practical Transformation of CIE Color Matching Functions  
Color Res.Appl.**7**(1),53-56(1982).
61. N.Ohta (in Japanese)  
A Simplified Method for Formulating Pseudo-Object Colors and Its Application to Colorimetric Problems  
J.Illum.Eng.Inst.Jpn.**66**(6),216-217(1982).
62. N.Ohta  
A Simplified Method for Formulating Pseudo-Object Colors  
Color Res.Appl.**7**(2),78-81(1982).
63. K.Takemura, N.Ohta, K.Izawa, and S.Kubo (in Japanese)  
Evaluating the Photographic Consistency of Taking Illuminants  
J.Soc.Phot.Sci.Tech.Jpn.**45**(4),268-275(1982).
64. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
IV. Influence of Some Practical Constraints  
Phot.Sci.Eng.**26**(5),228-231(1982).

65. T.Miyagawa, H.Urabe, N.Ohta, K.Takahashi, and M.Tsugita (in Japanese)  
A Total Simulation System for Color Photographic Images  
Jpn.J.Opt.**11**(6),573-578(1982).
66. K.Takemura, N.Ohta, and S.Kubo (in Japanese)  
Evaluating the Spectral Sensitivities in Color Photography  
J.Soc.Phot.Sci.Tech.Jpn.**46**(1),23-31(1982).
67. N.Ohta  
Optimization of Spectral Sensitivities  
Phot.Sci.Eng.**27**(5),193-201(1983).
68. N.Ohta  
Formulation of a Standard Deviate Observer by a Nonlinear Optimization Technique  
Color Res.Appl.**10**(3),156-164(1985).
69. N.Ohta (in Japanese)  
Color Reproduction in Color Photography  
Psych.Rev.**28**(1),147-166(1985).
70. N.Ohta  
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes.  
V.Optimum Absorption Bands as Defined by Nonlinear Optimization Technique  
J.Imag.Sci.**30**(1),9-12(1986).
71. N.Ohta  
Intersections of Spectral Curves of Metameric Colors  
Color Res.Appl.**12**(2),85-87(1987).
72. N.Ohta (in Japanese)  
Progress in Color Photography  
Chem.Today No.**233**,24-30(1990.8).
73. N.Ohta  
Interrelation between Spectral Sensitivities and Interimage Effects  
J.Imag.Sci.**35**(2),94-103(1991).
74. N.Ohta  
Colorimetric Analysis in the Design of Color Films: A Perspective  
J.Imag.Sci.Tech.**36**(1),63-72(1992).
75. N.Ohta  
Estimation of Luminance Factor from the CIE Supplementary Standard Colorimetric  
Observer  
Color Res.Appl.**17**(2),123-126(1992).
76. N.Ohta  
Optimum Density-Division in Color Imaging System  
Color Res.Appl.**18**(1),41-46(1993).
77. N.Ohta (in Japanese)  
Color Reproduction in Photography  
J.Inst.Telev.Engnrs.Jpn.**47**(4),504-512(1993).
78. T.Murooka and N.Ohta (in Japanese)  
The Color Target for Input Scanner Calibration  
J.Jpn.Soc.Printing Sci.Tech.**31**(3),179-185(1994).

79. N.Ohta  
Development of Color Targets for Input Scanner Calibration  
*Farbe* **39**(1-6),163-167(1994).
80. N.Ohta  
The Measurement and Specification of Colors  
*Jpn.Soc.Printing Sci.Tech.*34(4),287-292(1997).
81. N.Ohta  
The Measurement and Specification of Colors - 2  
*Jpn.Soc.Printing Sci.Tech.*34(5),347-353(1997).
82. N.Ohta  
The Measurement and Specification of Colors - 3  
*Jpn.Soc.Printing Sci.Tech.*34(6), 408-413(1997).
83. N.Matsushiro, N.Ohta, M.Q.Shaw, and M.D.Fairchild  
Optimizing Color-Matching Functions for Individual Observers Using a Variation Method  
*J.Imag.Sci.Tech.***45**(5),472-480(2001).
84. S.Quan and N.Ohta  
Evaluating Hypothetical Spectral Sensitivities with Quality Factors  
*J.Imag.Sci.Tech.***46**(1),8-14(2002).
85. M. R. Rosen, F. H. Imai, M. D. Fairchild and N. Ohta  
Data-Efficient Methods Applied to Spectral Image Capture  
*IS&T Reporter.***17**(4),1-3(2002).
86. M. R. Rosen, F. H. Imai, M. D. Fairchild and N. Ohta  
Data-Efficient Methods Applied to Unconstrained Spectral Image Capture  
*J.Soc.Imag.Sci.Tech.Jpn.***65** in press (2002).
