

## Software Engineer opportunity- Medical Devices- World Leader

I've just secured a fantastic new position for a Software Development Engineer at a World leading Medical Device company based in Cleveland, Ohio. It would be great to learn if you or someone you know would be a good fit...

The group that I'm working with develop best in class nuclear medical imaging systems. They require someone to support all stages of the development life-cycle working on a wide range of software components. It's a diverse and challenging position that allows you to work on innovative technologies and develop both your skills and career.

Based on your experience the salary range is between 85-100K + benefits and full relocation if needed.

Required skills include:

- BS or MSc in CS/EE or other relevant field
- 5+ years Software Engineering experience
- C/C++, RTOS and VxWorks experience
- Regulated environment preferred
- Medical imaging a huge plus

The opportunity with this team is phenomenal. If you are a talented and motivated Software Engineer, keen to pursue a career in Medical Devices then this is for you! Please respond with your resume if you would like to learn more, alternatively if anyone in your network fits this profile feel free to pass on their details.

I look forward to hearing from you.

All the Best,

Ben Walshe
