

Multiple openings - Rebellion Photonics

I wanted to get in touch with your group to see if you might want to circulate a few job openings that are available at our company in Houston, TX. We would love to extend the opportunity to fellow women in science and engineering.

If you have a listserv or alumni group that might be interested in receiving this information, please feel free to share the link below that has 3 openings at Rebellion Photonics, and have them reach out to me personally to submit their resume if anyone is interested. (Of course, they can also apply directly through careers@rebellionphotonics.com).

<http://www.indeed.com/jobs?q=rebellion+photonics&l=Houston%2C+TX>

I'm happy to answer any questions you might have about our company or the open positions.
