Miriam Spering, PhD
Dept. Ophthalmology & Visual Sciences and Center for Brain Health
University of British Columbia

Dr. Spering is a psychologist and neuroscientist investigating how the brain uses visual information to control movements in humans. She is an Assistant Professor in the Dept. of Ophthalmology & Visual Sciences at the University of British Columbia, Vancouver, Canada, where she directs the Neuroscience of Vision and Action (NOVA) Lab. She is also a member of the Centre for Brain Health, the Graduate Program in Neuroscience, the Institute for Computing, Information and Cognitive Systems (ICICS), and the International Collaboration on Repair Discoveries (ICORD). Prior to joining UBC in 2011, Dr. Spering was a postdoctoral fellow at New York University, funded by the German Research Foundation. She obtained her doctoral degree (summa cum laude) in psychology and neuroscience from the University of Giessen, Germany, and her Master's and undergraduate degree in psychology from the Universities of Heidelberg, Konstanz, and Exeter (England). Her research has been recognized by many awards, most recently an Early Career Scholar Award by UBC's Peter Wall Institute for Advanced Studies. Her laboratory is funded by the National Science and Engineering Research Council (NSERC) and the Canada Foundation for Innovation (CFI).

3PM, WEDNESDAY, APRIL 8, 2015
Carlson Auditorium, Center for Imaging Science (CAR)
