# Early TV Recording Technologies

Dr. Roger Easton, Jr.

The early history of television is replete with partially successful ideas that were cast by the wayside after further developments. One of the more interesting participants in this early history is John Logie Baird. Among other accomplishments, Baird was the first to record the video signals of the time. This talk will review Baird's efforts in video recording and the later work to successfully play back the few recordings remaining from that time.

**4PM, WEDNESDAY, OCTOBER 30, 2013**

**Carlson Auditorium, Center for Imaging Science (Bldg. 76)**
