CIS Intern Program: Sponsor an intern!

Now there is an opportunity for everyone to get involved! CIS is looking for partners to help support the next generation of imaging science students by providing internships to our dedicated and motivated students. This is a great opportunity to contribute to the future of imaging science at the University of Rochester as well as help provide students with valuable hands-on experience.

The benefits of the CIS intern program are vast. For the company, a CIS intern provides a cost-effective and efficient way to supplement your current workforce, gain new perspectives and skills, and add diversity to your team. For the student, this is an excellent way to gain hands-on experience, learn from experts in the field, and contribute to the growth of the research area. By sponsoring an intern, you also have the opportunity to be featured in the University Magazine and website, which to date has over 12,000 views.

The benefits to the student intern include gaining valuable work experience, building a professional network, and being able to reflect internship experience on their resume. The benefits to the University include more research projects, new ideas, and a diverse pool of candidates for future employment.

To support our intern program, we are offering a limited number of highly competitive internships. We invite you to take advantage of this opportunity to help raise a glass and toast the 2013 inductees. Even in the current economic climate, we are finding an increase in need for qualified students. The internship program is a win-win for everyone involved. Please join us in supporting our students and the next generation of imaging scientists.

For more information, please contact Dr. Jan van Aardt at vanAardt@ur.rochester.edu or 585-275-3408.
