

Biography:

Emily Cooper is an assistant research professor in the Psychological and Brain Sciences Department at Dartmouth College. Her lab examines the computational principles underlying biological perception, with an emphasis on 3D vision, perceptual graphics, and visual encoding principles. Dr. Cooper received her Ph.D. in Neuroscience from the University of California at Berkeley and a B.A. in Psychology and English Language and Literature from the University of Chicago. Prior to coming to Dartmouth, she was a postdoctoral research scholar at Stanford University in the Department of Psychology.
